Michael,

Your suggestion sounds good. I will run it by my desktop managers.

James.

James,

Sorry for sending an e-mail. It will be quick. Trying to find out the potential IT options for two SEE employees in the Kenai River Center in Soldotna, AK. This would be a time-sensitive request.

Background: Currently Phil North, ARU staff, has an office in the River Center. He has a laptop with a RSA Token. We have room for one work station (checking into options to expand) that will not impact our lease agreement. We have worked this out with Andy H. and the River Center folks. I have funding for a full SEE FTE. We are interviewing two candidates on Friday. Both candidates seem to be ideal for our needs, and we have heard that they are interested in only part time work. Ideally, if both work out, we would like to have them job share the full FTE. What IT options would we have given our constraints. Note: This is one of Dennis's priorities - to work on Bristol Bay watershed issues. Depending upon a

decision from Lisa Jackson, this may be a National priority as well.

Suggestion:

2 laptops with one port-replicator and one LCD monitor.

2 RSA tokens to allow them access to EPA server and intranet. They will be needing to communicate with Seattle.

Thanks
